NEWMARKET NH

Dear New Patient,

Welcome to Newmarket Dental! My staff and I are committed to providing you with high quality dental care and we want to ensure that every visit you make to our office is as pleasant and comfortable as possible.

It will be very helpful for you to know a little about our practice and our philosophy before your first appointment.

- Newmarket Dental provides a wide range of dental procedures, including restorations, crowns, dentures, extractions and root canals, as well as other restorative and esthetic procedures.
- At this first appointment, we will listen closely to any concerns you may have, we will perform a comprehensive oral examination, and take any necessary x-rays. After collecting this data, we will discuss our findings with you. We feel you should be well-informed about the status of your oral health!
- Before any treatment begins, we will advise you of all your options so you can make educated choices regarding your dental care. This means that we pledge to only recommend treatment that you need, and further, to work with you to offer alternatives based on your esthetic concerns, insurance coverages and financial resources. There is no one-size-fits-all approach to care at our office, and we do not believe in "up-selling!" We respect our patients, and our goal is to work within your means to provide you with the highest quality care in an atmosphere of mutual trust.

Thank you for choosing our practice to serve your dental needs. We look forward to providing you with the personal attention that results in a beautiful, healthy smile. If you have any questions in between appointments, please feel free to call us at 603.659.3392.

Sincerely,

A handwritten signature in black ink, appearing to read 'Nathan A. Swanson', is written over a horizontal line.
